WORK HISTORY

SOFTWARE ENGINEERING

Jupiter
August 2021 - March 2023

- Mobile app & Web development
- Led teams to implement various *critical* and *UI-heavy* features like the Invite-program, NUJO game, Savings Challenge etc. at *tight deadlines.*
- Was the lead owner of the *Home page team* on Jupiter app. Revamped Home page from scratch and implemented & maintained many new features.
- Later on moved on to the *Platform team* where I was responsible for solving critical problems like *OTA updates*, improving *web & app performance* etc.
- *Improved the app performance by ~40%.*

FULL STACK ENGINEER (CONTRACT)

Vidpedia
July 2023

- Was the founding engineer
- Responsible for the application from scratch
- Used Next.js for Frontend and Express.js for Backend
- Webapp link: https://vidpedia.io

SOFTWARE ENGINEERING INTERN

Jupiter
April 2021 - July 2021

- Revamped the Jupiter website from scratch.
- Website link - https://jupiter.money
- Integrated blog into the website using Ghost CMS.
- Was responsible for maintenance of website and blog.

PROJECTS

Chippie

Github Link

A CHIP-8 emulator built in C.
Learnt C while building the project.

Blog

udasi.me

This is my website/blog where I write about my adventures in code and life (coming soon).
Made in **Astro.js** & **Tailwind CSS**.
